PROFESSIONAL SUMMARY

I want to drive digital transformation and innovation, turning data and technology into strategic levers that accelerate performance and create lasting impact. With a background in project management, data analytics, and technical development, I bring strong analytical and cross-functional skills to the table. I am eager to deepen my consulting skills during this internship, learn from the best, and be an asset for your team. My main drivers are influence and continuous learning, and I am committed to helping companies thrive in the digital era through data-driven strategy and innovation.
