PROFESSIONAL SUMMARY

Consultant trained at ESCP and DCU, with project delivery inside Amazon in London and Paris and two years founding a data SaaS venture. Works where operating-model design meets analytics: KPI and reporting governance across a global logistics network, supplier performance in last-mile operations, and governance frameworks for financial-services clients.

EDUCATION

- | | | |
|------------------|---|---------------------------------|
| Sept 25 - Nov 26 | ESCP Business School
MSc in Strategy and Organization Consulting | Paris, France |
| | <ul style="list-style-type: none">• Master thesis: how project management practices adapt to the specific realities of each mission in consulting firms (multiple-case study across four contrasted firms)• Recommendations on what firms should standardize (scoping templates, risk grids, decision logs), junior onboarding and the shift to agentic AI• Consulting mission for a distributed innovation network: co-led the end-to-end workstream, triangulating interviews, workshops and quantitative signals, then multi-criteria prioritization and capacity-based sequencing into a phased roadmap and executive decision-support pack | |
| Sept 19 - May 24 | NEOMA BS Dublin City University
BBA in Global Business - dual degree | Reims, France Dublin, Ireland |
| | <ul style="list-style-type: none">• Business Analytics Specialization: Data Analytics, Data Mining and Predictive Analytics, Workflow and Data Management | |

PROFESSIONAL EXPERIENCE

- | | | |
|------------------|---|------------------------|
| May 26 - Sept 26 | HOWARD PARTNERS
Consultant Intern | Paris, France |
| | <ul style="list-style-type: none">• Supported engagement teams on strategic analyses, sector benchmarks and market studies in financial services• Contributed to the design of the firm's internal agentic AI solution: agents generating commercial proposals, acting as a CRM and producing meeting minutes• Built the firm's AI compliance framework at Partner request: seven signed and cross-referenced documents (usage charter, privileged-access charter, contractual clauses, processing register, authorized-tool list) mapping GDPR and professional-secrecy obligations for a banking and insurance client base | |
| Jun 24 - Oct 24 | AMAZON Amazon Hub
Operations Manager - Fixed-Term Contract | Paris, France |
| | <ul style="list-style-type: none">• Owned maintenance operations for a c.4,500-unit Amazon Locker fleet across France, a customer-facing last-mile channel• Held third-party field-service suppliers to a 96% within-2-working-days resolution SLA on technical incidents: incident triage, intervention scheduling, escalation and weekly SLA compliance reporting | |
| Jan 23 - Jun 23 | AMAZON Amazon Transportation Services
Project Manager Intern | London, United Kingdom |
| | <ul style="list-style-type: none">• Led the EU ATS KPI Library workstream for the Network Operations team on PerfectMile, Amazon's internal reporting platform feeding Business Reviews up to VP level: mapped an estate of c.100 metrics across 10 daily, weekly and monthly business reviews to resolve data inconsistencies and the absence of a consolidated metric view• Ran the feasibility assessment with the PerfectMile product team, established the automated metric catalogue was not buildable on the existing architecture, and recommended an alternative combining two native features (PerfectMetrics and Metric Audit)• Wrote the recommendation one-pager presented to the Head of Network Excellence and a Senior Program Manager: removed manual maintenance of the metric list, gave business owners visibility on metric refresh status, and enabled faster onboarding and ETA estimation for new metric requests• Ran intake for a new dashboard and the migration of a Weekly Business Review onto PerfectMile: collected business requirements, raised and tracked tickets with the tech team on behalf of business owners, and drove stakeholder follow-up to launch | |
| Nov 21 - Jan 23 | TENORIS ANALYTICS SaaS
Founder | Toulouse, France |
| | <ul style="list-style-type: none">• Founded a SaaS venture democratizing alternative financial data for European retail investors; recruited and led a 3-person technical team (dev, data scientist, accountant) from concept to working proof of concept• Defined the product roadmap: Python scraping pipelines, Kubernetes processing, GraphQL API and back-office monitoring; scoped dataset monetization as the route to revenue• Led TalentGrid, a three-sided education-to-employment marketplace: no-code e-portfolio product, value-based pricing (payment on successful hire) and a university-first go-to-market | |
